

PA-GLASS

TDS - Technical Data Sheet

Material specification

Commercial name: PA-GLASS

Raw material: polymer alloy (94% Polyamide, 6% chopped glass fiber)

Designation: 3d printing material

Supplier: Jdeal-Form srl

Mechanical properties

Туре	Test Method	Metric		
Tensile Modulus	ISO 527	4000Mpa		
Tensile Strenght Ultimate	ISO 527	95Mpa		
Impact strength	ISO 527	80 Kj/m2		

Thermal properties (GRANULE – printed part tests value available ASAP)

Туре	Test Method	Metric		
VICAT Softening	ISO 306B50	ТВА		
Degradation Temperature		295°C		
Flammability	lso 1210	НВ		
Max temp usage long term	ISO 2578	120°C		

Physical characteristics

Туре	Metric		
Density	1,18gr/cm3		
Diameter	2,85mm +/- 0,05		
Roundness Deviation	Max 3%		

Colors available

	Black	Natural	Red	Green	Blue	Yellow	
Shrink**							

*test parts have been printed according to XZ orientation, using 100% infill, 0.2mm layer thickness, 0.4mm nozzle on a production A2v2 printer. **150x150x15 test part, 25% infill, 0.2mm layers

The information supplied is supplied as informative: user should use it as material selection tool and/or comparison with available materials. Printed part performance may differ from published value, depending on part orientation, printing parameters, environmental conditions.

User must validate suitability of the printed part and its lawful to be used as desired: no warranty can be made (express or implied) to any use of 3ntr materials.

We reserve the right to improve our polymer formulations and/or revise our technical data.
