

**Science me Up is dedicated to accelerating and facilitating the development of knowledge by using science as a key player for addressing present and future socio-economic challenges, all while focusing on strong human values.**

## PRESENTATION

We are the link between our private or academic clients and the pool of scientific experts, bearing their specialized skills. Our winning strategy for both parties combines four fields of activity which revolve around our areas of expertise. We can provide a solution for your needs by either a recruitment policy focusing on high-level profiles, training courses to satisfy your needs, managing and organizing events you wish to host, or by our provision of services. As the scientific market grows increasingly more dynamic and competitive, and the brain drain jeopardizes local scientific excellence, we strive to provide a sustainable and perennial work environment

for our experts. This mindset has brought us to foster a rich and diverse collection of candidates who possess rare and specific skills and who will become exceptionally talented crew members in your company. When trusting us with the mission of fulfilling your needs in science, whether it be in aeronautics, ecology, civil engineering, computer science, metallurgy, or cancerology, Science me Up can guarantee the placement of experts who will fast-track your projects and help them take off beyond your expectations. Thusly, our specialists will boost your innovation and competitive strategies. Since Science me Up was created by two

scientific PhDs, it is a clear example of the added value and considerable potential that scientists have for achieving their goals. Their experience has led them to understand the obstacles which segregate academia and the private sector, and they overthrow established codes by bringing both worlds together. The two Science me Up innovation pioneers are reshaping the fundamental dynamics between the two environments, thereby rekindling the great value of academic research and transforming private industry.

## AREAS OF ACTIVITY

Recruitment

Science me Up will enable you to transform your company into a solar system, where all your greatest assets will revolve around your innovation projects. With our help, you can reach out and explore the expanse of our network of scientific expertise and browse the skills our PhDs and scientists possess. With this unique offer, we can provide an up-and-running solution for private research companies to boost their innovation strategy, flexibility, and R&D centers. With our help, you can build a reliable and efficient team!

Courses

At lightning speed, we can train scientists to prepare them to launch themselves on a career path in the industry, and provide courses for professionals to present how valuable scientific PhDs are for the industry. These courses cover every step candidates need to take: how to showcase their skills, plan applications and write résumés, and we even help them prepare for interviews. As a recruiter, you will discover the value and many assets of PhDs, and how their profiles are ideally suited for research in the industry.

Professional event promotion

Our main goal in this area is to build and foster bonds amongst the individual professional networks in which our clients evolve and encourage shared opportunities, collaborations, and innovation or competitiveness strategies. With our experience in event planning, acquired in a wide range of topics, we are an essential asset for the logistic organization of such events. Just as launching a rocket requires perfect planning, the preparation, scheduling, and coordination of events or meetings need elaborate and detailed management. With our assistance, you have a key to success.

Provision of services

Do you need help to draw up a special mission, an ambitious project, or a map of the stars? We can provide the adaptability, expertise, and safety plans you need to bring about the best conditions for success. Our management strategy and organization will enable you to effortlessly achieve any goal. On demand, we will select and send one or several experts to your company, each of whom is entrusted with your mission, equipped with seriousness and outstanding professionalism.

**Our views and objectives all align with a desire to serve you in boosting your activity, bringing all the key players together, combining skills, and spreading development areas. We will help you identify the best means to encourage innovation in your company. Feel free to contact us for any information or need, so we can offer you a tailored solution. Let us board this spaceship and embark on a great adventure!**
