

Eawag, the Swiss Federal Institute of Aquatic Science and Technology, is a Swiss-based internationally active research institute within the domain of the ETH (Swiss Federal Institute of Science and Technology). It is committed to the ecologically, economically and socially responsible management of water.

Part-time student assistant needed (approx. 30%)

In my team at the Department of Environmental Chemistry at Eawag, we are developing and curating enviPath (envipath.org), a freely available, internationally unique database on microbial biotransformation of anthropogenic contaminants in the environment. To further develop and curate the information in enviPath, we need help in extracting and encoding information on pesticide biodegradation pathways in soils from publicly available dossiers used for compound registration.

You:

- Are studying chemistry, environmental chemistry, or biochemistry
- Can read and interpret chemical structures and chemical reactions
- Are fluent in English
- Work on the project when you have time
- Work from home

We:

- Pay you an hourly salary of approx. 28 CHF
- Train you and supervise your work
- Provide you with a computer, if needed

When:

- Starting date: As soon as possible, realistically February 2022
- Project duration: 6 months (with possibility for extension)

If you are interested in working with us, please send a motivation letter and your CV to Kathrin Fenner (kathrin.fenner@eawag.ch, Phone +41 (0)58 765 5085).
