

Department of Chemistry

MSc Thesis in Chemical Biology

Title of Thesis: Investigating Small Ribozymes

Description / Project:

You want to work in the interface between Chemistry and Biology in the newly opened state-of-the-art research facilities at the University of Zurich?

You are interested in discovering and characterizing novel biological functions of small ribozymes?

You want to gain experience in working with radioactive isotopes?

Then you might want to consider writing your Master thesis with me!

I am a PhD student in the lab of Roland Sigel (find out more at www.chem.uzh.ch/sigel) and looking for a Master student to support my project. We offer a friendly atmosphere coupled with awesome science.

Methods:

You will learn techniques such as *in vitro* transcription of radio-labelled RNA, PAGE gel analysis, cloning, and much more.

What we expect from you:

If you are highly motivated to expand your horizon and like working on interdisciplinary projects, please send me an E-mail with your CV and I'll get back to you as soon as possible with more details.

Starting date:

Upon agreement

Research Group: Prof. Roland Sigel

Application:
