

Postdoctoral Position in Chemical Biology

Earliest possible start date: March 1, 2022.

About the position: The Laboratory of Chemical and Biological Probes at University of Zurich has an open position for a postdoctoral scholar in the broad area of chemical biology. The position is available immediately and funded for 1 year with the possibility of extension. Our lab is in the process of relocating to Zurich, but you can find information about our current research here: <https://locbp.epfl.ch>

About the candidate: Candidates must hold a PhD in biology or chemistry, in particular in the areas of bio(in)organic chemistry, chemical biology, biochemistry, biophysics or molecular biology. Experience in cell culture, genetic engineering and/or advanced microscopy is a valuable asset. We are looking for a strongly motivated individual, eager to do creative research at the interface of chemistry and biology, and able to work both independently and in collaboration within a diverse team.

How to apply: A motivation letter, CV, reprint of your most significant publication and contact details for three references must be submitted as a single PDF file to Prof. Pablo Rivera-Fuentes (pablo.riverafuentes@epfl.ch). Applications will be received until **November 30, 2021**.
